APCC #12507

As an Associate Professional Clinical Counselor, my goal is to provide a safe and welcoming space for our clients. My work is based on the foundation of empathy, understanding and giving the clients agency over their lives. I believe that all people have the power and intention to build a more enjoyable lifestyle, and addressing any mental health concerns is a great leap in the right direction. Although my focus is working with kids and teens, I have experience working with people from all ages and cultural backgrounds. My experience ranges from K-12 counseling, clinical counseling and career development. I am an alumni from CSU, San Bernardino with a Masters of Science in Counseling and Guidance.
